

Electric vehicle charging for business premises

Electric Vehicle Charging

By 2025, 25% of vehicle sales will be electric and many businesses are already getting ahead of the curve by installing an EV charging station at their business.

Whether your reasons for considering installation are environmental or to attract and retain new talent, there are a multitude of benefits to both your business and your employees.

Benefits of installing an EV charging station?

- Providing charging stations can encourage employees, visitors and customers in the area to make their next car an EV.
- Workplace EV charging stations will attract and retain top talent who are environmentally conscious.
- Improve your brand and reputation by sending a clear message to staff and customers that your business is working towards a greener future.
- Businesses can make cost savings annually on fuel by switching to an electric fleet.
- Reduce employee 'benefit' in kind tax for company cars.
- Retail businesses may motivate customers to stay longer.
- Reduce carbon emissions by creating a green fleet.
- Stay ahead of the competition by creating a greener more sustainable work environment.

Installing EV charge points at the workplace can be hugely beneficial for businesses and we're already seeing many innovative and forward-thinking companies enquiring about these services.

Taking the leap can be intimidating however, especially with the vast amounts of information and types of installation that is out there and investing in this technology is only worthwhile if it's sustainable.

Get in touch

As an independent company, we're able to provide our customers with cost-effective solutions from a wide range of leading charge point manufacturers depending on whether you want simple entry-level charging points to back-office managed systems.

At FMS we're passionate about supporting the UK's ambition to lower carbon electricity and we bring together high levels of skill, expertise and knowledge. If you're unsure of the charging point you require, we'll provide a free site visit in order to advise on which is most suitable for your budget.

To book your free site visit and obtain a no obligation quote, please contact us today on 01908 034040 or email info@fmsolutions.co.uk
